Circular No: GHAC/COU/2022-23/01

14<sup>th</sup> April 2022

**Subject:** Implementation of Air cargo Community System (ACS) for courier at GMR Hyderabad Air Cargo Terminal.

Dear Trade Partners,

Attention is invited to all courier agents/operators operating at GMR Hyderabad Air Cargo Terminal, Rajiv Gandhi International Airport, Hyderabad. As part of our e-freight initiative aligning with the Indian Government's "Digital India" vision, we are implementing the next generation Air cargo Community System (ACS) at our Air Cargo Terminal and this service will be run and managed by our technology partner M/s Kale Logistics Solutions Private Limited (KLSPL).

ACS is an electronic platform for digital interactions between various airport stakeholders such as airlines, shippers, freight forwarders, customs brokers, custodians, ground handlers, transporters, consignees, Chambers of Commerce, bonded truckers etc. This platform would lay the digital foundation for eliminating paperwork at our Air Cargo Terminal as well as faster processing of cargo as it reduces duplicate entries for all information and would help the community attract more cargo through improved digitized services. It would also help in enhancing security and planning processes which can further reduce dwell times at the airport. It would help the eco-system to comply with global regulatory and industry requirements such as e-AWB, e-CSD and other e-Freight initiatives and bring in transparency and visibility. It is also worth noting that the Kale ACS portal and services are already in use at other major airports in the country including Mumbai and Bangalore.

This circular is being issued to inform all concerned entities that the ACS portal services by Kale Logistics will be shortly available at [www.gmrcargo.com](http://www.gmrcargo.com) for online transactions for courier exports operations.

The key features, benefits available and transaction charges for the ACS users have been shared by Kale Logistics as detailed in Annexure A.

These features are only an indicative part of the feature list and accompanying benefits of the ACS Platform. Business partners are advised to familiarize themselves with these features to improve business efficiencies at our Air Cargo Terminal

Kale Logistics will also reach out to all Business Partners via email for onsite training on usage of the Portal and its various features in batches to be scheduled from 14 April`22.

For any questions or queries with regard to the ACS platform, you may please reach out to the Kale Logistics team at: [hydgmracssupport@kalelogistics.com](mailto:hydgmracssupport@kalelogistics.com).

Yours sincerely

**For GMR Hyderabad Air Cargo**

(A division of GMR Air Cargo and Aerospace Engineering Limited)

Purushottam Singh Thakur  
Chief Terminal Officer

### Annexure A

key features of Kale ACS for GMR Hyderabad Air Cargo Courier Operators
